

-Prospect-
ECTOCID RED MITE POWDER

- powder bottle x 20g, bucket x 140g, 700 g, sack x 700 g -

COMPOSITION:

Silicon dioxide

INDICATIONS:

Ready for use fine powder, with a broad spectrum of insecticide effect on most insects. It is used against red mites on poultry and against other crawling insects (cockroaches, ants, fleas, etc.) and flying insects (flies, wasps, etc.) It is indicated in for pest control of buildings, public vehicles, industrial buildings, pet shops and animal shelters, spaces used for livestock.

INSTRUCTIONS FOR USE:

Direct contact with the powder is necessary. Treated surfaces must be dry. Apply on all surfaces where insects hide, in animal shelters, cracks, crevices, buildings, behind stoves, refrigerators, and other places where insects gather. Relatively high humidity (above 75%) decreases the efficiency of the product. Take in consideration the lifecycle of the insects and make sure to have Red Mite powder for all phases of growth. The recommended rate of application is 20g of powder for a surface of 0.5 square meters, repeated weekly.

PRECAUTIONS:

Keep out of children's reach. Avoid contaminating food and feed. Avoid eye contact, wash your hands thoroughly after use.

STORAGE:

At room temperature (15-25 °C), kept away from moisture.

VALIDITY:

2 years, stored in it's own packaging.
