

- PROSPECT -
ECTOCID PERMET 6
- bottles x 20 ml,100 ml,1 L, 5 l –

COMPOSITION:

Permethrin 6 %

INDICATIONS:

Due to the active substance of the solution (permethrin - synthetic pyrethroids with a broad spectrum of activity and low toxicity to mammals), the product is both a contact insecticide, and an ingestion one, but without gas production, which has the advantage of allowing immediate re-commissioning of treated areas. Pyrethrins have neurotropic action, acting at the axon, in both central and peripheral nervous system. The effect takes place in two phases: - initially appears an excessive activity of nerve cells, causing hyper excitability on insects, tremors and convulsions. After this first phase follows the impulses transmission blocking that leads to insect paralysis and gradual death. The antiparasitic solution due to its content, once diluted forms a milky emulsion preventing the user from accidental ingestion, and dilutes quickly and uniformly. At normal levels of use the product is not phytotoxic, it has a reduced toxicity for the operator, the animal and the environment and it is biodegradable. The product is toxic to bees and fish.

With a broad spectrum of insecticidal activity on most insects, it is used to combat crawling insects (bugs, ants, fleas, etc.). Consequently it is used for pest control of buildings, public vehicles, industrial buildings, shops and livestock housing.

USE DIRECTIONS:

Diluted product should be sprayed with pressure pumps on the surfaces to be treated. For most insects ECTOCID PERMET 6 is diluted in water to concentrations of 1-2 % (100 - 200 ml of undiluted product in 10 litres of water), depending on the degree of the infestation. If the insects are more resistant, concentrations can be increased to 3-4% (300-400 ml of product in 10 litres of water). The diluted product is practically odorless, and does not stain painted walls, however application to freshly painted walls should be avoided, since pyrethrins are unstable in alkaline environment. The prepared solution should be used within the same day.

PRECAUTIONS:

H225 – Highly flammable liquid and vapour. H302 – Harmful if swallowed. H315 – Causes skin irritation. H319 – Causes serious eye irritation. H332 – Harmful if inhaled. H400 – Very toxic to aquatic life. H410 – Very toxic to aquatic life with long lasting effects. P102 – Keep out of reach of children. P261 – Avoid breathing vapours/spray. P262 – Do not get in eyes, on skin, or on clothing. P270 – Do not eat, drink or smoke when using this product. P271 – Use only outdoors or in a well-ventilated area. P280 – Wear protective gloves, eye protection, face protection. P391 – Collect spillage. P273 – Avoid release to the environment. P501 – Dispose of contents/container in accordance to local regulations. P301+P312 – IF SWALLOWED: Call a POISON CENTER or doctor/physician if you feel unwell. P337 + P313 – If eye irritation persists: Get medical advice/attention.

STORAGE :

Store in original containers at room temperature (15-25 degrees C), in dry places.

VALIDITY:

2 years from the date of production, stored under the prescribed conditions.
