

**- PROSPECT -  
ROBAN PASTA**

– plastic bags x 100 g, x 400 g sacks x 5 kg 10 kg 20 kg -

**ACTIVE SUBSTANCE:**

005% Difenacoum, anticoagulant on support of paste, packed in paper satchets of 15 g.

The product contains **BITREX**.

**Specific antidote: Vitamin K1.**

**INDICATIONS:**

For controlling mice and rat infestations in houses, stables and farm buildings, gardens, landfills, barracks, warehouses, wagons, containers, etc.. Difenacoum works by blocking the synthesis of prothrombin and capillary wall patency. Death occurs in 5-7 days after ingesting the bait.

**MODE OF USE:**

For rat control the product is placed in amounts of 4 satchets on a piece of paper or plastic material, in several places at a distance of 5-10 metres, away from light, moisture and out of reach of children and domestic animals, near the access routes, nests and feeding places of the rats. The piles of ROBAN PASTA are renewed as they are consumed, 3-4 days. To the extent that consumption ceases, then deratization is considered completed. For mice use 1satchets at a distance of 2-5 meters. Death occurs in 5-7 days.
