

PROSPECT
SOFAST
Surface insecticide for use against flies
- bottles x 50 g -

COMPOSITION:

5,0 g/kg Imidacloprid.

INDICATIONS:

For use against flies. It is recommended for interior and exterior use, zootechnic farms, households, and other civilian enclosures.

INSTRUCTIONS OF USE:

The recommended dose is 50 gramm for 25 square meters. It can be applied in two different ways:

- By dispersion in closed spaces, on dry surfaces, where insects are gathering, and animals don't have access.
- By brushing, in form of a paste, obtained by dilution with water, on places attended by insects. Mix 50 g of Sofast with 40 ml of warm water. After 15 minutes the paste can be applied with a brush or a roller. The effectively treated space is 1 square meter, spread uniformly over 100 square meters. Duration of effect is at least 6 weeks. Do not apply on food or object used for food preparation and surfaces used for food preparation or consumption.
