

HerbaTop Cocci-Plus

COCCIDIOSIS

No waiting time

Composition: 100 ml contains:

- Total flavonoids in quercetin equivalent 1,5 mg
- Total phenolics in gallic acid equivalent 4,5 mg
- Hidro-alcoholic extract of medicinal plants ad 100 ml

Indications:

HERBATOP COCCI-PLUS contains a medicinal plant extract with, coccidiostatic, antiprotozoal, antiseptic, antiinflammatory, antispasmodic, hepatoprotective, choleric, astringent, immunomodulatory properties.

It is recommended as an adjuvant for the prevention and treatment of coccidiosis and for the prevention of other protozoa (trichomonosis, histomonosis, giardiosis). It can be associated with other antiprotozoal drugs, potentiating the effect. Destroys the oocysts.

As secondary indications, it is indicated in liver failure, stimulates the secretion of the salivary glands and the secretion of the bile, in enterocolitis, indigestion, chronic and acute diarrhea, abdominal pain with cramps, intestinal bloating, lack of appetite, anemia. It is efficient in the treatment of bacterial, fungal and viral infections. In convalescence after digestive system disorders. It is recommended for use on horse, large and small ruminants, swine, poultry, turkeys, pigeons and rabbits.

Increases the weight gain.

Mode of administration:

It is administered orally, diluted in drinking water, for 5 to 7 days, in the following doses:

For prevention:

Colts, calves, piglets, lambs: 1 or 2 ml/10kg of bodyweight, 2 or 3 times a day.

Poultry, turkeys, pigeons, rabbits: in drinking water 2 or 3 ml/ 1 L of water, for 7 to 10 days.

Mounthly cures of 7 to 10 days are recommended.

Curative:

Colts, calves, piglets, lambs: 1 or 2 ml/5 kg of bodyweight, 2 or 3 times a day.

Poultry, turkeys, pigeons, rabbits: in drinking water 4 or 5 ml/1 L of water, for 7 to 10 days.

It can be administered continously if necessary. It can be used until sacrifice.
